L-861 Leveling Tool	T3-01-0063-001

SETTING FIXTURE

The AW9100 & AW9101 Setting Fixture is used to set both L-867 & L-868 light bases for elevation patterns with 10.25", 11.25", 13.25" & 14.25" bolt patterns.

The AW9100 has four legs for stability using T handles to adjust elevation, and the AW9101 uses four crank jacks for elevation adjustment. The center section with the bolt patterns and aiming pointers can be adjusted to rotate TDZ bases 4 degrees as well as can be rotated 90 degrees to accommodate different aiming setups.

COMPRESSION CRIMPER WITH DIES

The crimper is used for installing copper and aluminum lugs, splices, C-taps and Pigtails 8-2 AWG Cu, 10-6 AWG Al. It has a rotary color-coded die wheel and is equipped with a ratcheting Shure-Stake device (insures positive compression).

This crimper has a five-nested die wheel with red, gray, blue brown and green color-keyed lug nests. The ergonomically designed handle delivers comfortable crimping which requires 25% less handle force to complete the crimp cycle than the previous generation tool.
